

HR

Mechanical seals | Mechanical seals for pumps | Engineered seals

Features

- Single seal
- Balanced
- Independent of direction of rotation
- Multiple springs stationary
- Seat rotating
- Seat arranged directly behind the impeller
- Spring protection sleeve
- Variant with cylindrical spring and acc. EN 12756 (HRZ1) available
- Variant as cartridge with/without guide sleeve for application with/without quench (HR2, HR3)
- Dual seal as cartridge unit (HRKS-D) available

Advantages

- Especially for application in solids containing media without external flush or internal product circulation. Solids content 40 % (single seal) and 60 % (double seal)
- Operation under vacuum without seat locking possible
- Pumping screw for increased circulation available
- Springs are protected from product and leakage

Operating range

Shaft diameter:

dN = 36 ... 270 mm (1.4" ... 10.63")

Pressure: p1* = 16 bar (230 PSI)

Temperature:

t = -20 °C ... +160 °C (-4 °F ... +320 °F)

Sliding velocity: vg = 10 m/s (33 ft/s)

* For operation under vacuum it is

Materials

Seal face: Silicon carbide (Q1, Q2)

Seat: Silicon carbide (Q1, Q2)

Standards and approvals

- EN 12756

Notes

Direction of installation:

- From the impeller side: HR10
- From the bearing side: HR11

Recommended applications

- Process industry
- Oil and gas industry
- Refining technology
- Chemical industry
- Power plant technology
- Pulp and paper industry
- Water and waste water technology
- Mining industry
- Sugar industry
- Cement industry
- Contaminated, abrasive and solids containing media
- Sewage water pumps
- Dredger pumps
- Oil sand extraction
- Suspension pumps of flue-gas desulphurization plants (FGD)

RELY ON EXCELLENCE

necessary to arrange for quenching on the atmosphere side.

Item Part no. Description
DIN 24250

1.1	472	Seal face
1.2	520	Sleeve
2	412.1	O-Ring
3	474	Thrust ring
4	477	Spring
5	475	Seat (G11)
6	412.2	O-Ring
7	412.3	O-Ring
8	441	Housing

Direction of installation: - from the impeller side bearing side HR11

Seat alternatives

G2
 (dN 36 ... 90 mm)

G9
 (dN 95 ... 180 mm)

Product variants

HR2

Cartridge-type single seal with guide sleeve (Item no. 2) for use with quench. Insert (Item no. 1) either metal or silicon carbide.

HR3

Cartridge-type single seal. Insert (Item no. 1) either metal or silicon carbide. Optional without maintenance rinsing.

HRKS-D

Double seal in cartridge design for operation in barrier or buffer pressure (does not open if barrier pressure fails), available alternatively with a pumping screw for a higher rate of circulation. Torque transmission e.g. by shrink disk.

RELY ON EXCELLENCE

HRZ1

Single seal with cylindrical spring and type G76 seat. For installation in covers with installation dimensions according to EN 12756 B or U. Installation length l_{I1} corresponds to max. l_{IK} . Intermediate sizes on request.
